In this article you will learn about the types of parquet Board and the regulations of its choice.

The types of parquet boards

In order to correctly choose the floorboard in the town of The-Wrekin, the suitable, and to spend a minimum of time and Finance, you need a little awareness training. Ironing Board to buy. Namely, you should know the structure and main types of this floor covering. Parquet is durable and resistant to extremes of moisture, temperature, levels of flooring. In its structure three main parts: the top layer of the die which is made of precious wood, middle and lower layers of the cheaper types. A particular strength is achieved by alternating the orientation of the fibers relative to the length of the Board in each of the layers. Ideal for coating large surfaces with anti-slip decking. Because the top of the coating layer is made of a single piece of wood, in the collection they are most naturally and accurately convey the characteristics of the wood texture. Sheet piled floor Board price. PA Board is an option that will be as relevant as in rooms with large area and small. In contrast to the SSB in the upper part are two pieces.

Three-band version will have three strips of veneer. Its appearance it is maximum close to unit parquet coating and its use gives the room a special style and originality. Next view - plank with a chamfer. The presence of such elements is only possible on the Board with a top layer of natural wood. How many cubes in the Board 25x150x6000. This kind of creates maximum visual sensation of the wooden floor, allows you to perfectly adjust the gaps between the individual boards, and the proper location of the chamfers will visually lengthen the room or make it wider. There are also a separate species floorboard with special impregnation, which allows you to install this flooring in rooms with high humidity. This Board will be reliable in the kitchen, bathroom and hallway. Varies in The-Wrekin wooden Board and in the type of wood from which it is made. Manufacturers often use acacia, beech, cherry birch, oak, maple, larch, alder, walnut and ash. These species of trees are available, have good characteristics in strength, wear resistance. Have good texture and pattern of wood fibers on the cut surface.

Rules for choosing the parquet boards

The strength and endurance of the floorboard depends on the size of the top layer. It varies from 7 to 25 millimeters. The thick layer is subject to a greater number of treatments. For laying out the city of The-Wrekin floorboard of the residential profile, choose the option with the most thick top layer, especially when laying it directly on the concrete floor. How many cubes of the Board are in meters. Among all the types of wood most suitable is oak. Is the oak has the greatest durability and resistance to various loads that a floor covering is required. The next degree of stability to temperature changes and moisture are walnut, maple and cherry.

But the CBO should be selected only in a dry room. Limiting the humidity in which it will serve you well 60%. However, if you produce a treatment, and beech will become a reliable tool in a damp room. In this case, their stamina is increased. On the middle layer of the Board is allocated the full load. Therefore, it needs to be durable. To make the layer come from different varieties of pine trees or chipboard. Thus, it is cheaper. Edged 40x150x6000. Remember that this layer had the function of bearing, and therefore it is not worth saving. Ask what is covered Board. There may also be two options: lacquer or parquet oil. If we talk about natural, the oil is better. But it requires more careful maintenance. Lacquer is easy to process. His life in The-Wrekin depends on the number of layers. And, of course, don't forget the locks. They need to be high quality and durable, because it affects the end result of assembling your floorboard.
